

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (original): An organic electrolyte capacitor comprising:
a positive electrode,
a negative electrode and
an electrolyte capable of transporting lithium ions, wherein
the negative electrode active material is a mesopored carbon material having a pore
volume of 0.10 ml/g or more for pore diameter of 3 nm or larger.

Claim 2 (original): The organic electrolyte capacitor according to claim 1, wherein
the mesopored carbon material is one or a mixture of a plurality of members selected from
activated carbon, coconut shell coal, coke, charcoal, bamboo coal and resin carbide.

Claim 3 (original): The organic electrolyte capacitor according to claim 2, wherein
the resin carbide is a phenol resin carbide, or
the resin is a phenol resin.

Claim 4 (currently amended): The organic electrolyte capacitor according to ~~any one of~~
~~claims claim 1 to 3~~, wherein
the mesopored carbon material is produced by using Ni or Ni compound.

Claim 5 (currently amended): The organic electrolyte capacitor according to ~~any one of~~
~~claims claim 1 to 4~~, wherein
lithium ions are preliminarily supported on the negative electrode and/or positive electrode
so that the positive electrode potential is 2.0 V (Li/Li⁺) or lower, when the positive electrode and the
negative electrode are short-circuited.

Claim 6 (original): The organic electrolyte capacitor according claim 5, wherein
the organic electrolyte capacitor includes a positive electrode current collector and a
negative electrode current collector,
each of the current collectors has holes penetrating from surface to rearface, and
lithium ions are supported by being supplied from lithium opposed to the negative
electrode and/or the positive electrode electrochemically to the negative electrode and/or the
positive electrode.
